

## New Technologies - Trends and Opportunities in India

- The World is witnessing the Fourth Industrial Revolution
- Technological breakthroughs in Artificial Intelligence, Robotics, nanotechnology, Quantum Computing, Biotechnology, the Internet of Things (IoT), Blockchain, 3D Printing, and Autonomous Vehicles mark the era of Fourth Industrial Revolution
- Indian Government is also bringing in necessary structural reforms to promote appropriate ecosystem and regulatory framework

**Mr. Raj Nair, President, IMC**

"India, which is the fastest growing large economies of the world, offers huge opportunities for domestic and international communities because she is committed to grow not just in size but simultaneously, along certain dimensions which were outlined in the 10 year vision explained by the Finance Minister on February 1, 2019.

Growth in its simplest form results in higher purchasing power which is already getting reflected in the rapidly modernising offline and online retail sector. India is one of the fastest growing Retail Markets of the world. This a big opportunity for global and Indian players.

The Government's vision for the next 10 years, talks about creating NextGen infrastructure, Pollution free India, making India a manufacturing destination (Make in India), focus on Clean Water for the masses, emphasis on Coastal Waterways, Space program, Food self-sufficiency and making good Health Care available to all. To make all this possible there will be huge investments in the Digital India program because the solution is not merely hardware. Artificial Intelligence will be a big game changer in all these endeavours. International companies have golden opportunities to partner with Indian digital software talent to exploit not just the large Indian market but to stage a global play."

## Retail Industry - Trends & Opportunities in India

- Exponential rise in middle class has triggered a shopping revolution in terms of format and consumer buying behaviours
- With emerging opportunities, burgeoning middle class, robust demand and the untapped market of retail
- The Government of India has taken various initiatives to improve the retail industry in India, including single unified tax system

**Mr. Rajiv Podar, Chairman, IMC International Business Committee**

"India, one of the fastest growing economies of the world offers huge opportunities in AI and the Retail sector. The India Calling Conference focuses on both these sectors. As per a report by NITI Aayog AI has potentials to add 1 trillion to the Indian Economy by 2035.

India is one of the fastest growing Retail Markets of the world and as per a report expected to touch USD 1.1 trillion by 2020."

Opportunities in New Technologies and Retail Industry

**Monday, 25 March 2019 (from 9.30 a.m. onwards)**

Hotel Taj Lands End, Mumbai, India

**Why Should You Not Miss Attending The Conference**

India is witnessing tremendous growth potential in two major sectors of global interests and offer unprecedented opportunities for global corporations and businesses.

The one is in areas of breakthrough new technologies representing the Fourth Industrial Revolution; and the other is Retail Industry.

In the backdrop of huge potential for investment and collaboration in New Technologies and Retail Industry, **INDIA CALLING CONFERENCE** by IMC Chamber of Commerce and Industry is a platform for Indian and global players in these two industries to come together and debate, share insights and explore potential investment opportunities and collaborations, Indian and international experts from leading industry and government would share insights into development of markets in India, policy inputs and opportunities for companies to invest and collaborate in these areas.

## Focused Sessions

### Artificial Intelligence

- ▶ Opportunities and Policies
- ▶ AI and Banking and Finance
- ▶ Applications of AI

### Retail

- ▶ Opportunities and Policies
- ▶ Logistics and warehousing
- ▶ Global Perspective

## Pitch Competition

Shortlisted applications received from Start-ups in the areas of AI and Retail will make pitch for their innovative services and products.
