S.No.	Notification no./ date	Standard/ technical regulation/ conformity assessment procedure	HS Codes	Effective from	Remarks if any
1	18.06.2024	Technical Regulations	151790	22.12.2024	The Board of the Eurasian

					<p>Economic Commission, at a meeting on June 18, in order to implement Amendments No. 2 to the Union's technical regulations on oil and fat products (TR CU 024/2011) adopted in December last year (Amendments No. 2 were adopted by the Council Decision of December 12, 2023 No. 149), amended the Lists of standards to this technical regulation.</p> <p>The changes concern two positions. Firstly, the List of standards for voluntary application includes the national standard of the Russian Federation - GOST R 70954-2023 "Non-tempering cocoa butter substitutes of mixed type. Technical conditions". Secondly, the List of standards for methods includes four interstate standards and one research (testing) methodology of the Russian Federation, containing alternative research (testing) and measurement methods for the newly introduced safety indicator "glycidyl esters of fatty acids in terms of glycidol" in vegetable oils and fats.</p>
2	18.06.2024	Technical Regulations	8712	Up to 2026	<p>The Board of the Eurasian Economic Commission approved amendments to the Program for the Development of Interstate Standards Ensuring the Implementation and Application of the Technical Regulations "On the Safety of Products Intended for Children and Adolescents" (TR CU 007/2011). The amendments provide for the development or revision by 2026 of 34 interstate standards that concern requirements for a wide range of children's products (bicycles, dishes, diapers, clothing and footwear, school and writing supplies), as well as methods for determining the level of migration of harmful substances from</p>

					children's products.
3	18.06.2024	Technical Regulations	8412	18.07.2024	At a meeting on June 18, the Board of the Eurasian Economic Commission made targeted changes to the Program for the development of interstate standards to the technical regulations of the Customs Union "On the safety of equipment for work in explosive environments". The Program has been supplemented with two new interstate standards based on current versions of the standards of the International Electrotechnical Commission. It is also planned to update the replacement international standards developed in 2021-2022. The Russian Federation has been determined as the developer of the new standards.
4	18.06.2024	Technical Regulations	8537	18.07.2024	Decision of the Board of the Eurasian Economic Commission on June 18, targeted changes were made to the Program for the development of interstate standards for the technical and technical regulations of the Customs Standard "On the safety of low-voltage equipment" (TR CU 004/2011). The program is supplemented by five new interstate standards for power supply systems (UPS) and low-voltage distribution and control equipment based on the current standards of international electrotechnical commissions. The developer of the definition is the Russian Federation.
5	25.06.2024	Technical Regulations			On June 25, the Board of the Eurasian Economic Commission amended the Unified Sanitary Requirements, providing for the inclusion of maximum permissible levels (MPL) of anthelmintic veterinary drugs in food products of animal origin. The need to establish these MPLs is due to the fact that they are permitted for use

					in the states of the Eurasian Economic Union and are widely used in the breeding of productive animals. At the same time, the EAEU acts do not contain permissible levels of their content in food products of animal origin. The decision of the Board will come into force after the inclusion of the established MRLs in the Union's technical regulations "On the safety of food products".
6	25.06.2024	Technical Regulations	210690	25.07.2024	The Board of the Eurasian Economic Commission approved amendments to the list of standards for research (testing) and measurement methods to the technical regulations of the Customs Union "On the safety of food products" (TR CU 021/2011). The list has been supplemented with two new structural elements, which provide for the inclusion of 50 interstate standards, three national standards of the Russian Federation, three national standards of the Republic of Kazakhstan and 34 methods.
